

Jessica: A Collaborator's Guide

Ideal Working Conditions Caffeinated and fed with occasional walking breaks I'm most productive in the morning, least productive in the evening	On The Clock Usually 8-5 I'm typically reachable at any time that I'm awake, and I don't mind getting late night Slack's as long as you don't mind that I might not respond until the morning.
How to Reach Me Slack is best	How to Give Me Feedback Directly! I'd always rather know about a problem, rather than staying in the dark.
I Need... Clear expectations set	I Struggle With... Not feeling confident enough in a topic to provide meaningful feedback. If I'm not an expert, I assume others know best.
I Can Help With... Gene expression analysis, predictive signature extraction and evaluation, all things R, data visualization, baseline insight into cancer biology and treatment (from a student's perspective). I'm also a pretty good writer and can be very helpful at editing (shortening) documents.	Else
