

Eshan King - A Collaborator's Guide

Ideal Working Conditions I am flexible. I tend to have my best ideas while running or walking. I like to have lots of coffee and snacks nearby.	On The Clock I tend to keep normal working hours, but feel free to reach out any time (but don't be offended if I don't respond right away).
How to Reach Me Slack	How to Give Me Feedback I like to think I am good at receiving feedback. Don't hold back.
I Need... Time to think and a pad of blank paper. I like to throw out a bunch of ideas regardless of how well thought-out or feasible they are.	I Struggle With... Wanting to get involved with everyone's projects. I get really excited about science and math, and I often feel the urge to spout ideas or feedback that may not be appreciated, even if I'm not familiar with all of the background info. If I am butting in on your project too much, please let me know.
I Can Help With... Mathematical modeling, scientific programming, making figures in python, basic medicine.	Else
